Opacity & Visibility

Difference between: opacity, display & visibility

> Opacity:

- It specifies the transparency of an element.
- Its value is in between 0.0 to 1.0
- The lower value, the more transparent.
- The default value of opacity is 1

> Example:

0.2   1

Swipe to know something new...

❯ Visibility:

- It specifies whether or not an element is visible. Hidden elements take up space on the page.
- The default value of visibility is visible.
- The default value of opacity is 1

❯ Difference between opacity:0, display:none and visibility:hidden

- **display: none;** It will hide the whole element. And do not occupy space.
- **visibility: hidden;** It hides an element but occupy space.
- **opacity: 0;** When the transparency is 100%, elements are hidden and occupy space.
